SITA Connect

Addressing all your connectivity needs, anywhere in the world.

SITA Connect offers a network to integrate all your airport, baggage, passenger, and back-office applications, no matter who provides them. It empowers connectivity wherever you are, whether you're in the airport, your headquarters, or town locations. We can offer feature-rich managed network services with seasonal options and a flexible Service Level Agreement (SLA). SITA Connect is delivered on top of the largest network in the world and our best-in-class airport infrastructure.

BACKGROUND

Secured IP services

I need IP access across all my town and airport sites. How can I achieve this within budget?

Flexible connectivity

How can I find a service that's adapted to all my sites and their specific traffic requirements?

Connectivity adapted to my needs in an airport

How can I address different seasonal requirements and handle traffic growth with fast connectivity?

Leverage Internet access

How can I cut costs while offloading low priority traffic, with secure browsing adapted for my needs?

Adapt to the cloud environment

I need access to my cloud applications wherever I am in the world. How is this possible at different sites with different connectivity types?

SOLUTION

SITA Connect offers connectivity anywhere you operate through three sets of capabilities:

SITA Connect Corporate: IP bandwidth, all types of traffic, various SLA levels, integrated internet services, and access to cloud applications. All of this is possible whether you're based at the airport or in town locations.

SITA Connect Community: services designed explicitly for airport locations. These are delivered on top of SITA's shared common-use infrastructure and Internet traffic.

SITA Connect Internet: browse the Internet, offload traffic, or build your VPN at your site.

BENEFITS

- Access to the largest IP network in the world covering all your destinations
- Access to exclusive SITA owned infrastructure deployed at airports around the globe (AirportHub)
- Access to SITA, to a partner, or your own applications in the cloud
- Internet browsing breaking locally or in the cloud
- Seasonal connectivity options for some services
- One contract with simplified pricing and billing
- Rich feature set and levels of SLA
- Premium and light versions available for most services

RESULTS

750+

Airports connected with SITA Connect

600

Airports on SITA's shared infrastructure

220+

Countries and territories

SITA Connect

How does it work?

SITA CONNECT	SITA Connect Corporate	Corporate connectivity at airport and town
	SITA Connect Community	Shared connectivity services at the airport
	SITA Connect Internet	Internet-based connectivity services

SOLUTION COMPONENTS

The flexibility you need to connect your sites through:

1. SITA Connect Corporate
Dedicated bandwidth
- Traffic prioritization: 6 CoS (3 data, 1 voice, 1 video, 1 Internet)
- All types of access: LL, Ethernet, Satellite, xDSL, 3G/4G
- Rich feature set: Resiliency options, IPv6, multiple VPN, Multicast, others

2. SITA Connect Community
- Shared bandwidth/SITA infrastructure
- Access to any DCS and the Internet

3. SITA Connect Internet
- Pure internet connectivity
- Naked internet connections

CASE STUDY

A large European airline chose SITA Connect to deliver the simplicity of a single contract that covers all types of connectivity. This would give them access to new technical features and the opportunity to leverage embedded Internet and cloud access.

The customer-defined site profiles are based on business/operational needs, size, location, and Internet availability. Most of its applications are in the cloud. Our solution was comprised of the following for each of their sites:

- Main sites: **SITA Connect Corporate**
- Large to medium sites: **SITA Connect Corporate** or **SITA Connect Corporate at Airports** with Internet offload for browsing (local or gateway)
- Medium to small sites: **SITA Connect Light** or **SITA Connect Light at Airports** with Internet offload for browsing (local or gateway)
- Small airport sites: **SITA Connect Community DCS, SITA Connect Community Internet, SITA Connect Light**
