Flex Print&Go

To print baggage tag, scan your boarding pass

Put your passengers in control with effortless self-bag tagging

SITA

Self-driven bag tagging anywhere.

With Flex Print&Go, passengers can tag their bags wherever they choose via a low-impact, flexible touchpoint. Empower customers to take control of their journey, alleviating congestion at desks and kiosks to eliminate queues and speed up passenger processing.

Passengers expect a hassle free journey.

Easy, self-driven bag tagging

With Print&Go, passengers use the SITA FlexBox to complete the bag drop and tagging process themselves, using just their boarding pass. They simply scan their boarding pass to print their bag tag so they can continue their journey.

Because FlexBox can be deployed anywhere, you can enable passengers to use Print&Go anywhere too. Passengers can tag and drop their bags on public transport on the way to the airport, reducing pressure and queues at the terminal.

Give your customers more time back, for faster journeys and better experiences.

40 years of serving the industry

350 airlines served across the world

Over 460 airports where SITA Flex is used

Deliver flexible and simple bag tagging

Print&Go help you build differentiated operations and get more from your airport infrastructure.

More diverse ways for passengers to tag and drop their baggage means you can cater for a wider range of preferences.

Mobile-first touchpoints help to future-proof your operations and meet modern passenger expectations.

Simple self-service processes and flexible touchpoints mean your agents can spend less time stuck behind desks and can focus on customer service.

Reduced need for desks and kiosks helps cut the cost of your existing infrastructure and future investments.
