

SITA

SITA BORDER FLOW LANE

Turning trust into border flow.

What if border control could move with the traveler?

SITA Border Flow Lane transforms border control from a stop-and-check process into a move-through experience.

Travelers can continue naturally through the border, without needing to stop, separate from their party, present documents or interact with a device when no intervention is required.

Identity can be verified in motion. Eligibility can be confirmed in motion. Risk can be assessed continuously throughout the journey. All while maintaining traveler consent, privacy safeguards and government control over every border decision.

By reducing the need to concentrate every border decision at a single checkpoint, SITA Border Flow Lane helps airports and border agencies increase throughput and create more capacity from the infrastructure they already have, reducing the need to rely solely on new checkpoints, larger processing areas or terminal expansion.

The result is a new operating model where stopping becomes the exception rather than the rule.

Turning trust into border flow.

TRUST BEFORE ARRIVAL

Identity and eligibility are established before the traveler reaches the border.

PROCESS IN MOTION

Identity is verified while travelers continue moving through the lane.

CLEAR NEXT STEPS

Help travelers move confidently through the border.

INTERVENE WHEN IT MATTERS

Officers focus on travelers who require additional checks.

What happens when trust moves?

- 1 Travelers move through a controlled lane while identity is verified, eligibility is understood and routing decisions happen in context, reducing the need to stop when no intervention is required.
- 2 Officers focus their attention where additional judgment, action or escalation is needed.

The result is more than a different traveler experience. **It changes how authorities manage flow, intervention and capacity.**

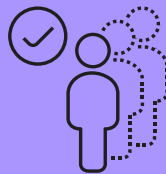

Key benefits:

5× MORE
CAPACITY

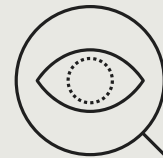

Process up to 3,000 travelers per hour per lane.

75%+ CLEARED
AUTOMATICALLY

Eligible travelers continue through the lane while officers focus only on the cases that need attention.

<20%
EXCEPTIONS

Help officers focus on the cases that need judgment, action or further checks.

TRUSTED
BY DESIGN

Built around traveler consent, privacy safeguards and government oversight.

GROUP
PROCESSING

Families and groups continue naturally through the lane without needing to split, queue or wait their turn.

NO STOP.
NO POSE.

No need to stop or look directly at a camera.

Why SITA?

75+

GOVERNMENTS

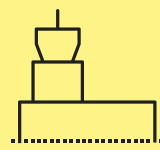

Trusted border technology partner to governments worldwide.

2.2B+

JOURNEYS

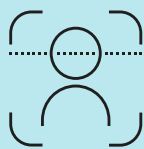

SITA technology supports billions of passenger journeys every year.

1,000+

AIRPORTS

Global airport footprint that gives SITA practical insight into live passenger operations.

5,000+

BIOMETRIC TOUCHPOINTS

Experience connecting identity into real passenger journeys at scale.

80K+

WORKSTATIONS

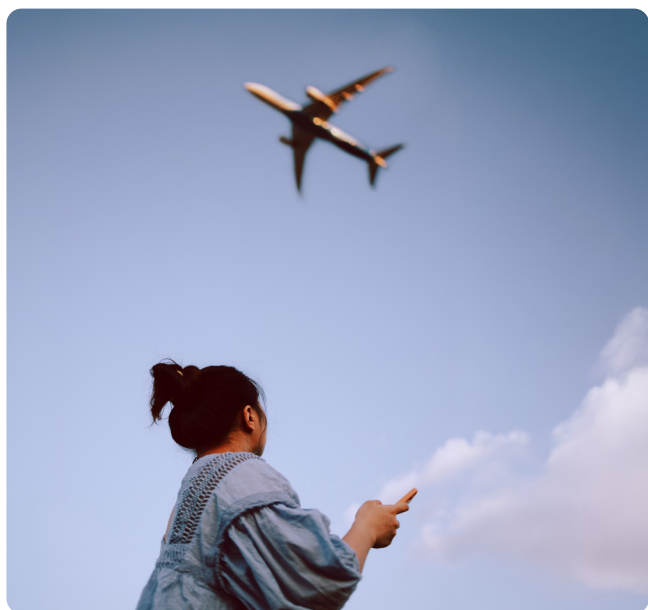

Border workstations addressable worldwide.

ONE

OPERATING VIEW

Helping authorities turn movement, identity and decisions into one operational flow.

Turn trust into flow.

The future border will be defined in real operations, with authorities ready to test how identity, flow and intervention can work together.

SITA is bringing the partners, technology and operational experience to build it with you.
